Aya Chosen for Young Explorers Program

Aya Anholt Chosen for the Pangaea Young Explorers Program

The goal of the Pangaea Young Explorers program is to expose youth to the world's most beautiful nature, to motivate and to take initiative to preserve our natural environment. For each expedition eight young adults aged 15-21 are chosen from a pool of applicants from all over the world.

Aya, a grade 10 student, applied for the program and was chosen as one of 15 youth chosen to attend the expedition selection camp. At the selection camp, Aya was chosen as one of the top eight Young Explorers that will be attending the Pangaea expedition #10. She was the only Young Explorer representing Canada, and was also the youngest.

During the expedition, Aya will explore the Everglades, the Florida Keys and sail around the Gulf of Mexico in a massive 32-meter double-masted sailboat. Environmental education during this extraordinary opportunity includes taking detailed observation, water samples, species records and other readings from the area to study the effects of human inhabitation, fuel emission, waste disposal and the oil spill.

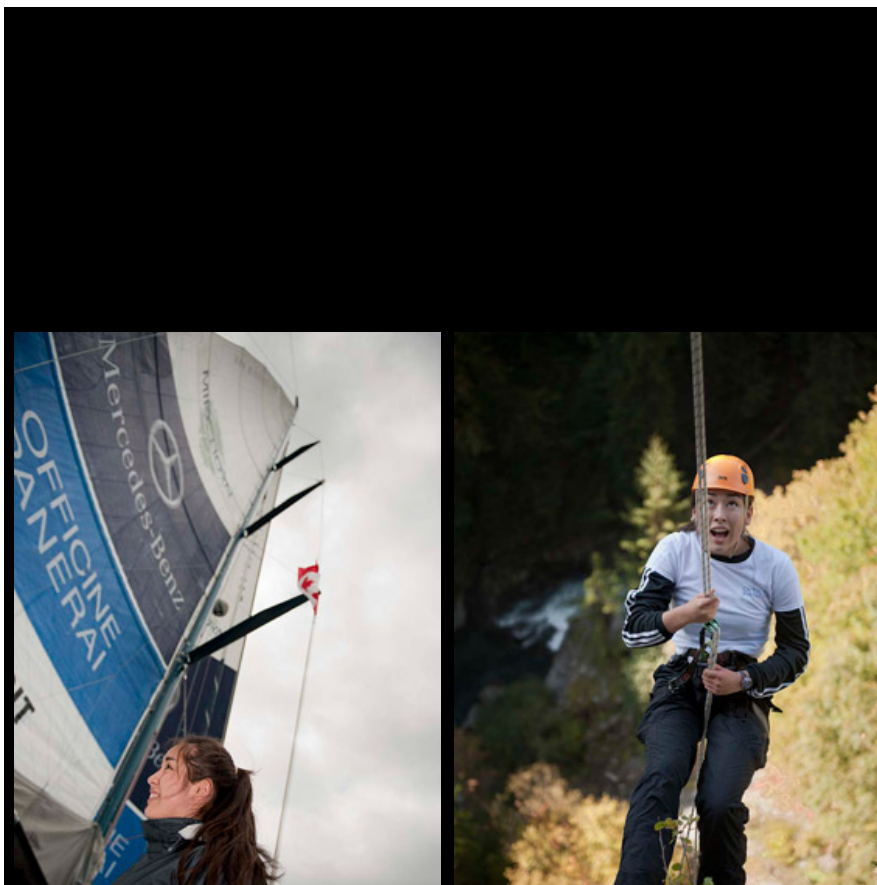

The expedition is from November 13th to December 4th. You can follow Aya while she is on her expedition and find out about how YOU can apply and get involved here:
